DESCRIPTION

Elegant decorative hood with stainless steel finish.

SILENT SPLIT TECHNOLOGY. Solutions of silence.

"Silent-split" technology allows reductions in noise in the kitchen up to 70%.

In Cata we have created quieter campaigns of the market through remote extraction system, in which engine is located on the roof of the House or in a suspended ceiling, rather than placed in the inside of the Bell. This noise is reduced, since the engine is outside the room.

Both the installation system of the motor on the roof (Silent Split Exterior) as the installation in the false ceiling (Silent Split In-line) system, they are designed on the needs of users and are very simple to install.
